Boy, do I have a great story for you!

I just bought a new Cobia 194 with a CE Smith T-top.

My son and I were driving to the beach this past weekend to take the boat out on her maiden voyage.

We stopped at the McDonald's on Highway 70 in Kinston to grab something to eat. Having never towed a boat with a T-top before, I was not very alert of the height clearance issue.

Well, after pulling away from the drive thru window, we hear this loud crashing noise. Down comes part of the McDonalds awning! The T-top had crashed into it!

I pulled over to inspect the damage to McDonalds and to the boat. The only damage to the T-top was some red paint marks on the leading edge of the T-top and a 5" tear in the canvas top! (The McDonalds folks were very friendly, saying it happens all the time!)

So, I just wanted to let you know what an incredibly strong T-top you guys make! I was really amazed!

Can I order a replacement navy blue canvas top from you guys?

Thanks,

John Watkin
